

## District of Columbia, Maryland, and Virginia Marketplace

### Formulary *Last Update: 10/3/2017*

The formulary is a list of drugs covered by your plan. The preferred drugs in the formulary are chosen by a group of Kaiser Permanente physicians and pharmacists known as the Pharmacy and Therapeutics Committee. The Committee meets regularly to evaluate and select drugs that are safe and effective for our members.

This formulary applies only to outpatient drugs and self-administered drugs. It does not apply to medical service drugs or medications used in inpatient settings or administered in one of the Kaiser Permanente medical centers.

You may have specific exclusions, copays, or coinsurance amounts that are not reflected in the formulary drug list. Please consult your *Evidence of Coverage or Membership Agreement* for additional information regarding your pharmacy benefits, including any specific limitations or exclusions.

### Generic, Brand Name and Specialty Drugs

Kaiser Permanente covers generic, brand name and specialty drugs at the applicable tier copay or cost share.

A generic drug is approved by the Food and Drug Administration (FDA) as having the same active ingredient as the brand name drug.

Brand name drugs are manufactured and sold by the pharmaceutical company that originally researched and developed the drug. When the patent on a brand name drug expires, other pharmaceutical companies may then manufacture and sell the FDA- approved generic version of the drug at lower prices.

Specialty drugs are high cost, prescription medications used to treat serious or chronic medical conditions and require special handling, administration or monitoring.

In most cases, your doctor will prescribe a generic drug if one is available. Generic drugs generally cost less than brand name or specialty drugs.

### Using the Kaiser Permanente Formulary List

When you look through the formulary drug listing beginning on page 3, you will see that products available in a generic form are listed by their generic names. Medications that are only available as a brand name product are listed in **BOLD AND ALL CAPITAL** letters, except where multiple branded products exist.

You can search the formulary drug list by using the "FIND" function in Adobe Reader, or by

referencing the therapeutic drug category.

The first column of the chart lists the drug name. Please note that some drugs have multiple dosage forms. Examples of dosage forms are tablets, capsules, creams, injections, etc. Please note that not all dosage forms and strengths for a particular drug listed may be on the same drug tier.

The second column, "Drug Tier" will indicate what tier number the drug is in. Drugs on the Formulary are categorized in one of four tiers.

Tier 1: Generic Tier

Tier 2: Preferred Brand Tier

Tier 3: Non-Preferred Brand Tier

Tier 4: Specialty Tier

Please remember that this list is subject to change and will be updated from time to time during the year. Any product not found on the list will be considered non-formulary.

### **Restrictions on medication coverage**

Some covered drugs may have additional requirements or limits on coverage. Please consult your *Evidence of Coverage or Membership Agreement* for additional information regarding your pharmacy benefits, including any specific limitations or exclusions.

- Limited distribution: Some drugs may be subject to limited distribution or restricted access. A drug that is a limited distribution drug may only be available at one or a limited number of pharmacies.
- Oral chemotherapy drugs: Drugs that fall under the District of Columbia and State of Maryland Oral Chemotherapy Parity Act.
- Quantity limit: For certain drugs, Kaiser Permanente Pharmacy and Therapeutics Committee limits the amount of medication dispensed to a certain quantity per copay.
- Zero Cost Share Preventive Drugs: Drugs that are covered at \$0 when written on a prescription.
- Medical Service Drugs: Drugs that may be covered under your medical benefit (physician visit or hospital visit). Medical service drugs require administration by a clinician or in a facility. They are not dispensed through the outpatient pharmacy.

**Key:** (Refer to "Restrictions on medication coverage" section, above, for definitions of these terms)

**LD** = Limited Distribution Drugs

**OC** = Oral Chemotherapy Drugs

**QL** = A drug with a quantity limit

**PRV** = Zero Cost Share Preventative Drugs

**MSD** = Medical Service Drugs

For more information about the Marketplace Formulary Drug List, you may contact Member Services at **301-468-6000** or **800-777-7902 (TTY 711)**. Representatives are available Monday through Friday, 7:30 a.m. until 9 p.m.
