IMPORTANT LEGAL INFORMATION

Before choosing a health benefit plan, please review the following information along with the other materials enclosed.

Eligibility

You can apply for coverage for yourself or with your family. You must be a United States citizen or a lawfully present non-citizen and a legal resident of the Commonwealth of Virginia and not entitled to or enrolled in Medicare. Family health coverage includes you, your spouse or domestic partner and any dependent children. Children are covered to the end of the month in which they turn age 26.

Our plans are available in all areas except the City of Fairfax, the Town of Vienna and the area east of State Route 123. Anthem HealthKeepers Silver X 5300 Online Plus plans are only offered in select counties and cities. See the benefit chart for more information.

Eligibility for a catastrophic plan

You are eligible for this plan if you:

- are also under age 30 before the plan's effective date; or
- have received certification from the Health Insurance Marketplace (the exchange) that you are exempt from the individual mandate because you qualify for a hardship exemption or do not have an affordable coverage option

Open enrollment

As established by the rules of the exchange, individuals are only permitted to enroll in a Qualified Health Plan (QHP), or as an enrollee to change QHPs, during the annual open enrollment period or a special enrollment period.

American Indians are authorized to move from one QHP to another QHP once per month.

Special enrollment and changes affecting eligibility

In addition to open enrollment, an individual can enroll during the special enrollment period. This is a period of time in which eligible individuals or their dependents can enroll after the open enrollment, typically due to an event such as marriage, birth, adoption, or other qualifying events as defined by law.

Effective date of coverage

The earliest effective date for the annual open enrollment period is the first day of the following benefit year for a Qualified Individual who has made a QHP selection during the annual open enrollment period. A subscriber's effective date is determined by the exchange based on the receipt of the completed enrollment form. Benefits will not be provided until the applicable subscription charge is paid to HealthKeepers.

Managing your care if you need to go to a hospital or get certain medical treatment

If you or a family member need certain types of medical care (for example: surgery, treatment in a doctor's office, physical therapy, etc.), you may want to know more about these programs and terms. They may help you better understand your benefits and how your health plan manages these types of care.

Utilization review

Utilization review (UR) is a program that is part of your health plan. It lets us make sure you are getting the right care at the right time. Our utilization review team, made up of licensed health care professionals such as nurses and doctors, does medical reviews. The team goes over the information your doctor has sent us to see if the requested surgery, treatment or other type of care is medically necessary. The utilization review team checks to make sure the treatment meets certain clinical guidelines set by your health plan. After reviewing the records and information, the team will approve (cover) or deny (not cover) the treatment. The utilization review team will let you and your doctor know as soon as possible. Decisions not to approve are put in writing. The written notice will include information on how to appeal the decision and about your rights to an independent medical review.

Reviewing where services are provided

A service must be medically necessary to be a covered service. The utilization review may include a review of the level of care, type of setting or place of service where services can be safely given to you. If services are given in a higher level of care or cost setting when they could be safely given in a lower level place of care or cost setting, they will not be determined to be medically necessary. The service(s), in that case, are being denied based on the review of where they are provided. When this happens the service(s) can be requested again in another setting or place of care and will be reviewed again for medical necessity. At times, a different type of provider or facility may need to be used in order for the service to be considered medically necessary.

IMPORTANT LEGAL INFORMATION

Examples include, but are not limited to:

- A service may be denied on an inpatient basis at a hospital but may be approved if provided on an outpatient basis in a hospital setting.
- A service may be denied on an outpatient basis if taking place in a hospital setting but may be approved at a free-standing imaging center, infusion center, ambulatory surgical center/facility, or in a physician's office.
- A service may be denied at a skilled nursing facility but may be approved in a home setting.

We can do medical reviews like this before, during and after a member's treatment. Here is an explanation of each type of review:

The pre-service review (done before you get medical care)

We may do a pre-service review before a member goes to the hospital or has other types of services or treatment.

The concurrent review (done during medical care and recovery)

We do a concurrent review when you are in the hospital or are released and need more care related to the hospital stay. This could mean services or treatment, such as physical therapy or durable medical equipment. The utilization review team looks at the member's medical information at the time of the review to see if the treatment is medically necessary.

The post-service review (done after you get medical care)

We do a post-service review when you have already had surgery or another type of medical care. When the utilization review team learns about the treatment, they look at the medical information the doctor or provider had about you at the time the medical care was given. The team then can see if the treatment was medically necessary.

Case management

Case management is conducted by a licensed health care professional who works with you and your doctor to help you learn about and manage your health conditions. They also help you better understand your health benefits.

Precertification

Precertification is the process of getting approval from your health plan before you get services. This process lets you know if we will cover a service, supply, therapy or drug. We approve services that meet our standards for needed and appropriate treatment. The guidelines we use to approve treatment are based on standards of care in medical policies, clinical guidelines and the terms of your plan. As these may change, we review our precertification guidelines regularly. Precertification is a type of pre-service review.

Here is how requesting precertification can help you:

Saving time. Preauthorizing services is a process of verifying, in advance, whether a proposed treatment, service or supply is medically necessary and/or medically appropriate. The doctors in our network ask for prior authorization for our members.

Saving money. Paying only for medically necessary services helps everyone save. Choosing a doctor who is in our network can help you get the most for your health care dollar.

What can you do? Choose an in-network doctor. Talk to your doctor about your conditions and treatment options. Ask your doctor which covered services need prior authorization or call us to ask. The doctor's office will ask for prior authorization for you. Plus, costs are usually lower with an in-network doctor. It is important to understand that HMO plans do not offer out-of-network coverage, with the exception of emergency care as described in the Evidence of Coverage or urgent care services received at an urgent care center or when a service is preapproved. Please review the Evidence of Coverage in order to determine your benefits. Once you are a member, if you have a question about prior authorization, you can call the Member Service number on the back of your ID card.

In-network providers

In-network providers are the key to providing and coordinating your health care services. Benefits are provided when you obtain covered services from providers in our Pathway X Tiered Hospital network. It is a good idea to have a primary care doctor (PCP) for things like checkups and health issues that need ongoing care; but you are not required to select a PCP or get a referral to seek care from in-network specialty doctors.

Services you obtain from any provider outside of our network are considered out-of-network services and are not covered, with the exception of emergency care or urgent care, or a service that is authorized in advance by HealthKeepers.

IMPORTANT LEGAL INFORMATION

The only services covered outside our network are emergency care as described in the Evidence of Coverage and urgent care services received at an urgent care center. In addition, you will have emergency and urgent care coverage through the Blue Cross and Blue Shield Association's BlueCard® program using the Traditional (PAR) network. When you use BlueCard providers in the Traditional network, you will be protected from balance billing.

Laws and rights that protect you

As a member, you have rights and responsibilities. You have the right to expect the privacy of your personal health information to be protected, consistent with state and federal laws and our policies. You also have certain rights and responsibilities when receiving your health care. Visit this link to find more information on our website: <http://www.anthem.com/health-insurance/customer-care/faq>.

A high-deductible health plan is not a health savings account (HSA). An HSA is a separate arrangement between an individual and a qualified financial institution. To take advantage of tax benefits, an HSA needs to be established. 2 Orthodontia is usually considered dentally necessary when a child's teeth are misaligned (crooked or not spaced correctly) to the point where they don't work properly. This could cause the child to have trouble speaking or eating. Some examples would be (1) if a child can't bite into an apple because they can't close their front teeth together or (2) if a child bites into the gum tissue of the palate (roof of the mouth) when they try to bite down.
